Learning Together in the Imagination Playground

Block play builds imaginations and creativity while laying a foundation for early math and science learning.

Things to do together:

- ✿ Stack blocks to make a tower, a castle or a fort!
- ✿ Create a base for your child and let him stick long tubes into the holes.
- ✿ Lay out the aqueduct shapes and watch a ball roll through along it.

Questions to ask:

- ✿ "Which is bigger, this block or that block?"
- ✿ "How many blocks did you use to build that?"
- ✿ "Can you make a square (or a circle, triangle, or rectangle) with the blocks?"

Show your child:

- ✿ How to stack two blocks upright and balance a third block on top.
- ✿ How to build a bridge with blocks.
